INTERNATIONAL SEARCH REPORT

is International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons: Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely: Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically: 3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Pule 6.4(a). Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet) This international Searching Authority found multiple inventions in this international application, as follows: see additional sheet 1. As all required additional search fees were timely paid by the applicant, this international Search Report covers all searchable claims. 2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.: No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims, it is covered by claims Nos.:	ere found unsearchable (Continuation of item 2 of first sheet)	ox II Observations where certain claims w

Remark on Protest The additional search fees were accompanied by the applicant's part of additional search fees. No protest accompanied the payment of additional search fees.	The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.	Remark on Protest

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-14

Methods for determining the relative swing curve amplitudes for a plurality of wafer processes in which reflectances as a function of wavelength of different photoresist coated wafers are compared.

2. claim: Claim 15

A plurality of wafers coated by different processes which have been exposed to actinic radiation.
